Interesting Upcoming Calls

INNOSUP-05-2018-2020
Peer Learning for Innovation Agencies

Open until 17 March 2020; 14 October 2020

This call seeks to foster the exchange of good practices while using peer learning to investigate and support SME innovation with an intention to put those newly developed skills into practice.

INNOSUP-08-2020
Pan-European advanced manufacturing assistance and training for SMEs

Open until 1 December 2020

There is a need to reinforce the competitiveness of manufacturing SMEs embracing the Industry 4.0 revolution and the uptake of advanced manufacturing technologies. Actions will create a pan-European advanced manufacturing assistance programme to achieve cross-border training and development of frameworks for those training programmes.

INNOSUP-01-2018-2020
Cluster facilitates projects for new industrial value chains

Open until 2 April 2020; 8 September 2020

Proposals under this call should define strategic and new industrial value chains across the EU where SMEs and clusters are better exploited. Collaboration and networking activities are to be set up by SMEs and cluster intermediaries.

EACEA/33/2019
Centres of Vocational Excellence

Open until 20 February 2020

This call aims to support both establishing and developing transnational cooperation platforms of Centres of Vocational Excellence, aimed at connecting Centres operating in a local context at European level.
SwafS 14-2018-2019-2020
Supporting the development of territorial Responsible Research and Innovation

Open until 15 April 2020

This call aims to implement RRI on a territorial level (local, regional... up to consortia) considering the 5 principles of RRI: ethics, gender, scientific education, public engagement and open access. Partnerships seek solutions for common territorial issues and RDAs are the link between academia and citizenship.

Swafs 23
Grounding RRI in society with a focus on citizen science

Open until 15 April 2020

Projects under this call should implement institutional changes to promote citizens’ and associations’ engagement in science, if possible, with an integrated approach which would cover the five fields of RRI. The overall aim is to contribute to a greater involvement of all stakeholders in R&I, including a sustainable engagement with citizens, and a more scientifically interested and literate society.
