

## PRESS RELEASE #3

# Month 14 of U-Eco

### ERASMUS DAYS 2020 - WEBINAR

In occasion of the Erasmus Days 2020, the U-Eco consortium member EURADA (the European Association of Development Agencies), hosted the webinar "Building Skills for the Future Economy". The event presented several projects which contribute to a more skilled workforce and/or the recognition of skills across national borders, within – and sometimes even beyond – the EU. Among these was U-Eco. The webinar represented a great opportunity for U-Eco as its findings and results managed to reach a wider and wider audience: spreading knowledge is key in transitioning to a circular economy!

### COORDINATION MEETING

Work is progressing! On November 11th, the U-Eco partners met online to discuss the coordination of the last Intellectual Output of the project, which will involve the creation of a manual for trainers. The consortium is working hard to deliver the best possible final result!

### NEXT EVENT

The U-Eco project partners will next meet on the 2nd of December to check the progress of the project. By then, the second Intellectual Output will be finalised, and the consortium will focus on the creation of the trainers' manual.

### WHAT IS U-ECO?

U-Eco ("Upskilling for more creative circular ECONomy") is a project that focuses on the process of transition towards a circular economy, addressing the need for specific circular economy training that is able to boost employability and self-employment while meeting new labor market demand.
